Summary

- Senior full-stack engineer with hands-on ownership across backend, frontend, cloud infrastructure, and CI/CD, from architecture through production delivery.
- Strong background in TypeScript, Node.js, React, AWS serverless, and event-driven systems, building reliable and maintainable products end to end.
- Additional depth in developer tooling through internal automation, CLI workflows, and IDE extensions that reduce engineering friction and improve team productivity.
- Experience mentoring engineers, improving delivery practices, and helping teams ship more consistently through pragmatic standards and structured execution.

Technical Skills

- **Languages**: TypeScript, JavaScript, Move, Ruby, Solidity, Rust (learning)
- **Backend**: Node.js, Koa, Express, Rails
- **Frontend**: React, Svelte, Vue.js
- **Cloud & Infrastructure**: AWS (Lambda, DynamoDB, SNS, SQS, EventBridge...)
- **DevOps**: Docker, Terraform, CI/CD pipelines
- **Architecture**: Microservices, Event-driven architecture
- **Tools**: Git, Codex, Skills, internal CLI
- **Blockchain**: Sui, Ethereum, Smart Contracts
- **Methodologies**: Scrum (Scrum Master), Kanban (Scrum Master with Kanban), Agile

Employment History

Senior Full-Stack Blockchain Developer - OpenZeppelin| Remote | 2022-Present

- Contributed end to end to Defender, building AWS secure microservices and Svelte interfaces for a production blockchain observability and automation platform.
- Built a Typescript tooling layer for Sui contract development, covering deployment workflows, artifact capture, contract interaction, and end-to-end test harnesses that made contracts easier to test, debug, and ship.
- Maintained and extended Wizard, the web application used to assemble contracts from OpenZeppelin components across multiple languages, improving the developer experience for contract creation.
- Built and optimized CI/CD pipelines that improved release quality and consistency.
- Improved team delivery by training new developer and facilitating Scrum ceremonies, tightening engineering workflows, and reinforcing release discipline

Senior Software Developer - Aldo | Montreal, Canada | **2021**

- Delivered end-to-end order management services in a microservices and event-driven architecture, owning implementation from design through deployment and supporting reliable production operations.
- Built tested TypeScript services with a functional approach, limiting sides-effects and improving maintainability.
- Deployed and operated AWS serverless systems using Lambda, DynamoDB, SNS, SQS, and EventBridge to support scalable, event-driven order workflows.
- Built internal CLI and IDE tooling that reduced development friction and made team workflows more consistent.
- Built and optimized CI/CD pipelines that improved release quality, consistency and faster delivery.
- Improved team delivery by strengthening onboarding, training new developers, and tightening day-to-day engineering workflows facilitating Scrum ceremonies.

Lead Full Stack Developer and Scrum Master - Speekers| Montreal, Canada | **2020**

Led development workflow improvements alongside full-stack delivery, building JavaScript and TypeScript backend services, implementing Docker and Terraform environments, and creatingtooling and process structure to support team execution.

Co-founder and CTO - VizzMD at Centech's Acceleration Program | Montreal, Canada | **2019**

Set product and technical direction as co-founder/CTO, translating market feedback into product decisions, building the MVP with Rails and React, and establishing the technical foundation for early-stage execution.

Teacher for the Full Stack Developer Program - Le Wagon | Montreal, Canada | **2019**

Taught core full-stack development concepts and coached students through project delivery in an intensive bootcamp environment.

Web Analyst & Data Engineer - LCI Education | Montreal, Canada | **2018**

Built data pipelines and automated reporting workflows, developed performance metrics, and supported digital marketing operations across major paid media channels.

Education

Professional Scrum with Kanban - Scrum.org I Certification	**2022**
Certified Ethereum Developer - Blockchain-Council.org I Certification	**2022**
Professional Scrum Master - Scrum.org |Certification	**2021**
Product Manager Program - Linky Product Bootcamp | Bootcamp	**2020**
Full Stack Developer Program - Le Wagon | Bootcamp	**2019**
Master's Degree in Sociology – Magna Cum Laude | UQAM	**2017**
